SUMMARY

I'm currently pursuing a Bachelor of Vocational Studies (B.VOC) in Artificial Intelligence and Data Science aspiring for web developer, with hands-on knowledge of HTML, CSS, JavaScript, and basic backend development. Experienced in creating responsive web pages and simple dynamic websites using Python and Django/Node.js. Possesses a strong interest in learning modern web technologies, writing clean code, and contributing effectively to real-world projects through internships or entry-level opportunities.

TECHNICAL SKILLS

- **Programming & Scripting:** Python, JavaScript, HTML, CSS, Bootstrap
- **Web Development:** Django, Responsive Web Design, CRUD Operations
- **AI & NLP:** Basic Natural Language Processing, Text Processing
- **Database:** MySQL, SQLite, Power BI, Excel, Azure
- **Tools & Platforms:** Git, GitHub, VS Code, WordPress
- **Other Skills:** Problem Solving, Logical Thinking, Debugging, Team Collaboration

EDUCATION

Bachelor of Vocational in Artificial Intelligence and data science

2023-2026

Thakur college of engineering and technology

8.6 CGPA

CERTIFICATIONS

- 1) Microsoft Excel Associate (MO-200)
- 2) NASSCOM Future Skills (1)- Web developer
- 3) NASSCOM Future Skills (2)- Business intelligence
- 4) NVIDIA Deep Learning Institute (2)
- 5) NVIDIA Deep Learning Institute (3)

PROJECTS

1) HTML & CSS Portfolio

- Designed and developed a responsive personal portfolio website using HTML, CSS, and Bootstrap.
- Used Bootstrap grid system and components to create structured and mobile-friendly layouts.
- Implemented sections such as About, Skills, Projects, and Contact with a clean user interface.

2) Data Visualization (Power BI)

- Developed an interactive dashboard using Power BI to visualize key business metrics.
- Connected and transformed raw data from Excel/SQL into meaningful insights.
- Created charts, KPIs, and slicers to allow dynamic data exploration.
- Enabled data-driven decision making by highlighting trends and performance indicators.

3) Django Food Mart (Django +Python)

- Developed a Food Mart web application using Django with features for product listing and category-wise browsing.
- Implemented user authentication including login, registration, and logout functionality.
- Built dynamic pages using Django templates to display food items from the database.
- Designed a responsive user interface using HTML, CSS, and Bootstrap.
- Integrated basic CRUD operations for managing food products and orders.

4) Django Online clothing (Django +Python)

- Developed a dynamic online clothing web application using Django following the MVC (MVT) architecture.
- Designed category-wise and product-wise listings with detailed product pages.
- Implemented user authentication and authorization including registration, login, logout, and session handling.
- Built a shopping cart system to add, update, and remove clothing items using Django sessions.
- Implemented order management system to place orders and store order details in the database.
- Integrated a dummy payment workflow to simulate checkout and order confirmation.
- Performed CRUD operations for products, categories, and orders using Django models and admin panel.
- Designed a responsive and user-friendly UI using HTML, CSS, and Bootstrap.
- Used Django templates and template inheritance for code reusability and clean layout.
- Implemented basic form validation and error handling for better user experience.
- Managed static files and media files for product images.
- Tested application functionality including authentication, cart flow, and order placement.

4) AI Chatbot (Python, NLP)

- Created a basic chatbot using Python to respond to user input.
- Used if-else conditions to match keywords and generate replies.
- Implemented simple string handling such as lowercase conversion.
- Designed a loop-based chat system for continuous interaction.
- Responded to basic user messages like greetings and exit commands.
