## SUMMARY

---

I am a driven AI & Full-Stack Developer currently pursuing a B.VOC in Artificial Intelligence and Data Science (8.6 CGPA). I have a strong foundation in modern web development, specializing in Python, React, JavaScript, and Node.js. Eager learner, constantly staying one step ahead of challenges, and driven to solve real-world problems through innovative AI solutions and clean, efficient code. web developer, with hands-on knowledge of HTML, CSS, JavaScript, and basic backend development. Experienced in creating responsive web pages and simple dynamic websites using Python and Django/Node.js.

## TECHNICAL SKILLS

---

- **Programming & Scripting:** Python, JavaScript, HTML, CSS, Bootstrap
- **Web Development:** Django, Responsive Web Design, CRUD Operations
- **AI & NLP:** Basic Natural Language Processing, Text Processing
- **Database:** MySQL, SQLite, Power BI, Excel, Azure
- **Tools & Platforms:** Git, GitHub, VS Code, WordPress
- **Other Skills:** Problem Solving, Logical Thinking, Debugging, Team Collaboration

## EDUCATION

---

**Bachelor of Vocational in Artificial Intelligence and data science**

**2023-2026**

Thakur college of engineering and technology

8.6 CGPA

## CERTIFICATIONS

---

- 1) Microsoft Excel Associate (MO-200)
- 2) NASSCOM Future Skills (1)- Web developer
- 3) NASSCOM Future Skills (2)- Business intelligence
- 4) NVIDIA Deep Learning Institute (2)
- 5) NVIDIA Deep Learning Institute (3)

## PROJECTS

---

### 1) **CFM AI Application (AI / Enterprise)** *React, Node.js, Azure OpenAI, Azure AI Search, Tailwind CSS*

- Engineered a secure, enterprise-grade AI assistant utilizing React and Node.js to streamline internal operations.

- Integrated Azure OpenAI to provide a robust general GPT-4o chat interface for employees.
- Developed a highly accurate Document Search mode powered by Azure AI Search, ensuring queries are answered based strictly on uploaded company policies and SOPs, improving data security and compliance.

## **2) Employee Appraisal System (HR Tech / Full Stack) *Node.js, Express, HTML5, Bootstrap 5***

- Designed and developed a comprehensive web-based employee appraisal platform.
- Implemented robust role-based access control (RBAC) accommodating distinct permissions for Employees, Supervisors, and HR personnel.
- Built dynamic search functionalities for supervisors, engineered multi-stage approval workflows, and instituted form-locking mechanisms to ensure data integrity during review cycles.

## **3) Story Haven (Full Stack) *Node.js, Express, SQLite, HTML/CSS/JS***

- Created a full-stack story-sharing platform employing Node.js, Express, and SQLite.
- Implemented robust user authentication systems and role-based access control to manage reader and author privileges securely.
- Engineered content locking functionality and developed an automated reading-time calculation algorithm to enhance user engagement.

## **4) CFML Corporate Website (Web Development) *HTML, CSS, JavaScript, Vite***

- Designed and developed a highly responsive professional corporate website for CFML.
- Crafted a modern user interface showcasing company services, team information, and corporate history to improve online brand presence.
- Optimized frontend asset delivery and loading speeds using Vite, significantly improving overall site performance and user experience metrics.

## **5) Immersive 3D Experience (Web Development) *Next.js, React, Tailwind CSS***

- Architected a modern web application centered around immersive 3D user interfaces utilizing the Next.js framework, React, and Tailwind CSS.
- Optimized performance and SEO capabilities by implementing Server-Side Rendering (SSR) through Next.js.
- Focused on delivering a highly interactive and visually engaging user experience with seamless animations and responsive design principles.

## **6) IntraDesk Portal (Enterprise Portal) *React, Node.js, PostgreSQL, Prisma, Azure AD***

- Developed a secure, centralized internal knowledge portal for company employees leveraging React, Node.js, PostgreSQL, and Prisma.
- Integrated Azure Active Directory (Azure AD) for enterprise-level Single Sign-On (SSO) authentication and identity management.
- Built sophisticated document management features including advanced search capabilities with dynamic department filters and a comprehensive admin control panel.

## **7) CFMARC Business Connect (Web Portal / Full Stack) *Node.js, Express, HTML/JS, Nodemailer***

- Engineered a multifaceted business connection web portal using Node.js and Express.
- Implemented OTP-based secure login protocols to ensure secure access to sensitive business data.
- Integrated a Learning Management System (LMS) service to fetch and display borrower details, alongside a functional payment gateway and an automated chatbot system for immediate user assistance.

## **8) CFMARC OCR System (AI / Data Extraction)** *HTML/CSS, Node.js, Express, Nvidia AI (Nemotron)*

- Developed an advanced Optical Character Recognition (OCR) tool designed to streamline corporate data entry processes.
- Leveraged Nvidia's Nemotron AI models to accurately extract precise text coordinates and render complex documents.
- Engineered an intelligent mapping system to automatically map extracted text to corresponding database variables, significantly reducing manual data entry time.

## **9) HTML & CSS Portfolio (Web Design)** *HTML, CSS, Bootstrap*

- Designed and developed a responsive personal portfolio website from scratch utilizing HTML, CSS, and the Bootstrap grid system.
- Created structured, mobile-friendly layouts ensuring optimal viewing experiences across a wide range of devices.
- Implemented comprehensive sections including About, Skills, Projects, and Contact within a clean, accessible user interface.

## **10) Data Visualization Dashboard (Data Analysis)** *Power BI, Excel, SQL*

- Constructed an interactive, data-driven dashboard using Power BI, Excel, and SQL to visualize critical business metrics.
- Extracted, transformed, and loaded (ETL) raw data from complex SQL databases and Excel sheets into meaningful, actionable insights.
- Developed dynamic charts, Key Performance Indicators (KPIs), and intuitive slicers to facilitate comprehensive data exploration and inform strategic business decisions.

## **11) Django Food Mart (Full Stack Web)** *Django, Python, HTML, CSS*

- Developed a dynamic Food Mart web application utilizing Django and Python following the MVC architectural pattern.
- Implemented comprehensive user authentication systems including secure registration, login, and session management.
- Built category-wise product browsing features and integrated robust CRUD operations to facilitate seamless product and inventory management via an administrative interface.

## **12) Django Online Clothing (E-Commerce)** *Django, Python, MVC Architecture*

- Architected a comprehensive online e-commerce clothing store using Django and Python.
- Engineered a functional shopping cart system with real-time updates and seamless Django session handling for unauthenticated and authenticated users.
- Developed an end-to-end order management system and integrated a dummy payment workflow to simulate secure checkout and order confirmation processes.

## **13) AI Chatbot (AI & NLP)** *Python, Natural Language Processing*

- Built a conversational AI chatbot leveraging Python and fundamental Natural Language Processing (NLP) techniques.
- Utilized condition-based keyword matching and string manipulation algorithms to process user input accurately.
- Designed a loop-based, continuous chat system capable of generating intelligent, context-aware responses to basic user queries and commands.
